Hi Dennis,

After talking to Fran I think we will just need to take day trips down on Wednesdays to cover the 1030am Operations Meeting and site visit at that time to give a weekly update to management. So, this should be the last full week of being on-site. Until they start dismantling the 3 tanks that held the MCHM/PPH. Then management is interested in us having additional over sight than just once a week. Fran is going to confirm tomorrow this plan will satisfy them, just wanted to give you a heads up.

Melissa
